

## Evaluation of the efficacy of a *Clostridium perfringens* type A toxoid vaccine for pigs using a toxin challenge model and under field conditions

*Untersuchung der Wirksamkeit eines Clostridium perfringens-Typ-A-Toxoid-Impfstoffes für Schweine mit einem Toxin-Challenge-Modell und unter Feldbedingungen*

Sven Springer, Regine Fricke, Michael Bulang, Olaf Bastert, Jacqueline Finzel, Thomas Lindner, Tobias Theuß, Volker Florian

**TABLE 1:** Evaluation of clinical symptoms after intoxication of the piglets (score) under laboratory conditions

Parameter	Score
General condition (overall clinical impression)	0 = undisturbed 1 = disturbed
Posture	0 = normal, body supported equally by all four limbs, animal moves physiologically 1 = unsteady gait, kyphosis 2 = animal unable to get up
Behavior	0 = normal, animal is attentive 1 = listless 2 = somnolent
Milk uptake*	0 = yes 1 = no

\* Milk intake was assessed visually and by weight gain.
